Connect to "LAN (PoE)" port

PoE injector power cable

LAN port

PoE port

15ft ethernet cable
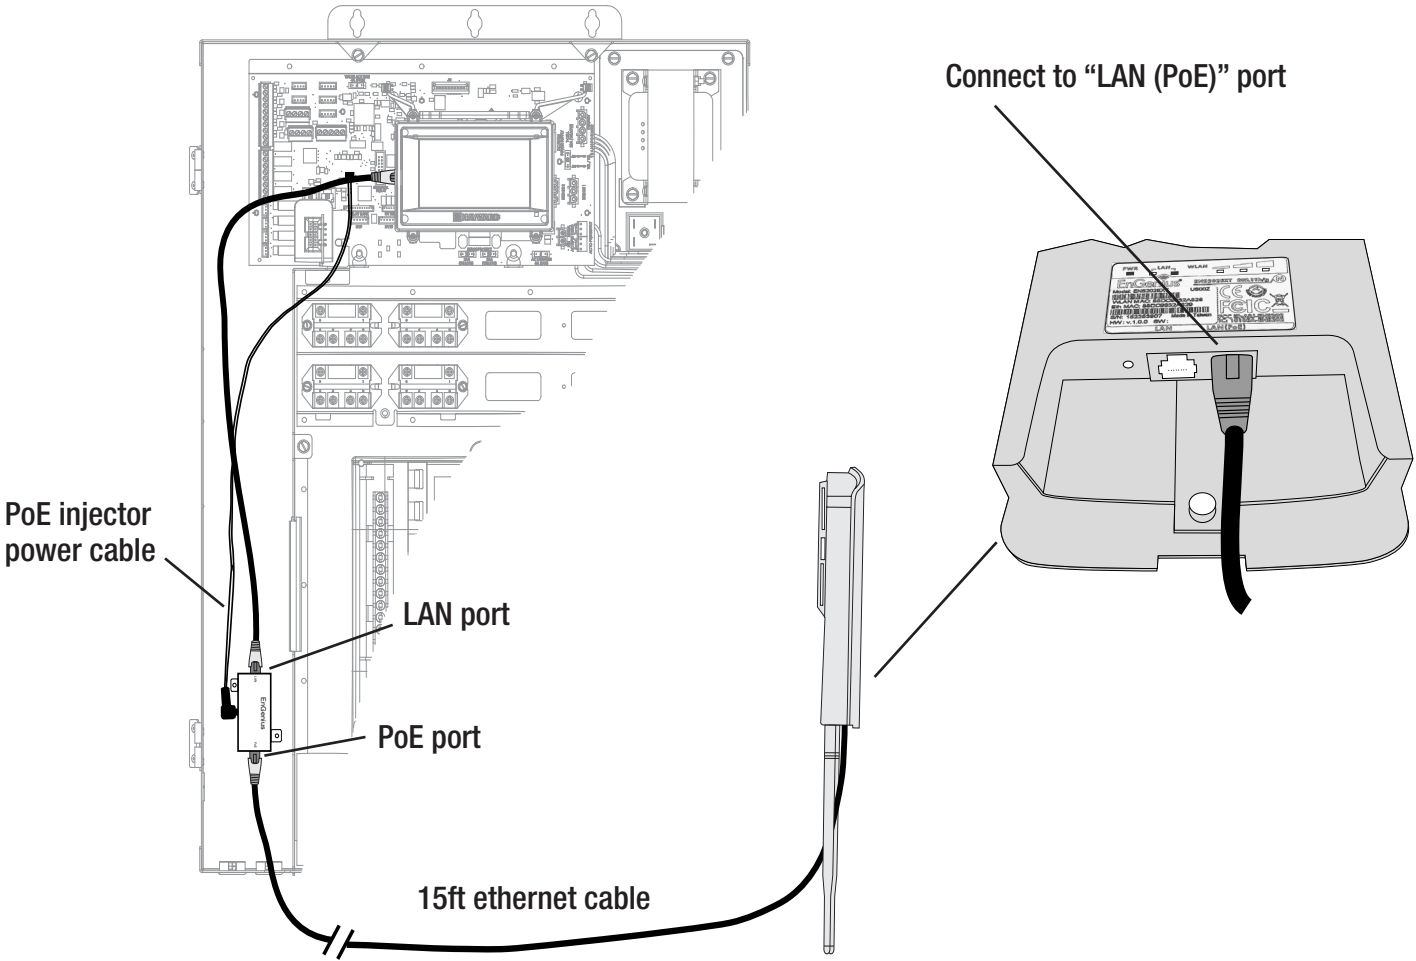

Check your OmniLogic Firmware before Installing this Product

current firmware version

The HLWLAN requires that the OmniLogic run version R4.1.1 or newer firmware. Before installing the HLWLAN, check the current version of firmware and upgrade if necessary. If an upgrade is needed, OmniLogic firmware can be found at www.hayward.com/firmware. For detailed instructions on how to upgrade, view the Release Notes found next to the firmware links. After the OmniLogic's firmware has been upgraded, proceed with the HLWLAN installation. Refer to the HLWLAN Installation manual for more information.
