HAYWARD® CAT CONTROLLERS® FOR BETTER AUTOMATED CHEMISTRY CONTROL

CAT5500

CAT1000

Commercial pools, spas, water parks and water treatment facilities

worldwide rely on **Hayward® CAT Controllers®** to provide enhanced water quality management.

Every model provides unmatched control over pH, ORP and sanitization for. CAT Controllers are compatible with all types of chemical feed equipment.

Packages include machined acrylic flow cells with rotary flow sensors and Asahi valves or molded flow cells with float style flow sensors and Parker Ball valves. Also included are speedfit connectors and tubing with mounting on a PVC backboard.

CAT2000

The **CAT5500** is a powerful water chemistry controller complete with TDS, temperature and salt monitoring. CAT5500 wireless communicating controllers are equipped with state-of-the-art sensing and control capabilities tailored specifically for salt chlorine application for the convenience in pH, ORP, NaCl sanitization and internet-based monitoring.

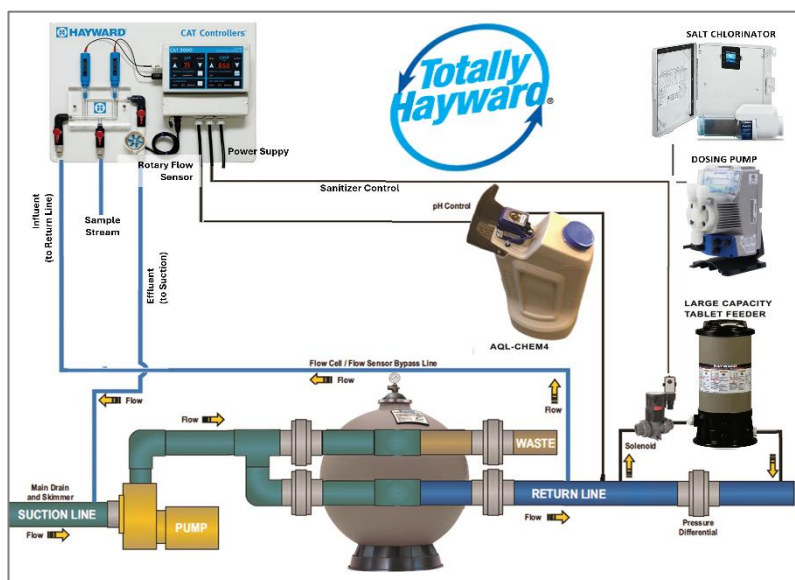

Scan the QR code watch a demo on PoolComm

Wireless, web-based models are available with Wi-Fi connectivity to allow remote monitoring of water quality of multiple commercial pools and spas through the revolutionary **PoolComm®** app that's free to download on iPhone and Android.

The **CAT2000** with simple installation constantly monitors pH and sanitizer activity and automatically implements chemical feeding.

The **CAT1000** is ideal for monitoring and controlling the pH level reducing most cases of red eyes and itchy skin, maintaining sanitizer effectiveness and preventing degradation of pool surface and equipment.

SV Series Solenoid Valves

Hayward SV Series Solenoid Valves are true union solenoid valves available in PVC and CPVC.

The valves have a corrosion resistant polyester coil and a four-position electrical connection.

The valves are available in a normally closed design rated at a non-shock 150 PSI at 70 °F. 110V is the standard voltage with additional voltages 12 VAC, 24 VAC, 220 VAC, 12 VDC, 24 VDC available as options.

Available with FPM or EPDM seals.

The valves have a 2-year warranty as standard and are manufactured in compliance with ISO9001:2008.

The solenoid valve can be used in a chemical feed system with tablet feeders, to autofill a pool with fresh water, and in water features. The valve can also be used in non-pool applications including irrigation systems.

AQL-CHEM4™ LIQUID CHEMICAL DISPENSING -Safe and Eco-Friendly

Hayward's **AQL-CHEM4** Liquid Dispensing Systems offer reliable and durable solutions for automatic liquid dispensing in many applications including dosing of acid or chlorine in swimming pools.

AQL-CHEM4-ACID

AC035 Feed Pump

The energy efficient system consists of a high gallon Hayward branded tank made of UV resistant plastics, and the **AC035** low-power fixed output pump that works with 110V-220V 50/60Hz.

Refill is made easier than ever, employing an upright, ergonomic design and convenient built-in handles.

It can be managed with any on-off controller or control system.

The AQL-CHEM4 can be used with Hayward's **AquaRite S3**, **OmniLogic**, **OmniHub** or **Commercial CAT Controllers**.

Hayward Chlorine Tablet Feeders

Hayward automatic chemical feeders are ideal during new pool construction or aftermarket installations.

Models are available for in-line and off-line configurations to accommodate most capacity, plumbing and space considerations. Larger units can be used for commercial pools.

All units incorporate a durable ABS body along with a high-quality Viton® seal and an ergonomically designed cover to allow for simple removal.

For use with tri-chlore granular chlorine only.
