

# PRODUCT DISCONTINUATION NOTICE

The production of the following product has been discontinued

## Model: SP1070 SKIM-MASTER SERIES SKIMMERS

The SP1070 and SP1070S skimmers are no longer being made by Hayward as the products have come to the end of their life cycle.

Also the design of the SP1071 series of skimmers has been changed in response to the request from a number of pool professionals. Hayward has launched an updated SkimMaster that offers PVC slip connections instead of ABS slip connections. The new skimmers will have 2" x 2.5" PVC ports for the solvent weld version, 2" internal threads (instead of 1 1/2" threads) and higher flow rating (75 gpm vs 55 gpm). Only the connections have been changed to PVC. The body of the skimmer will be ABS.

**Discontinued from:  
December 2019**
